

Welcome

Welcome to Hope Family Medical Centre. We are a long-established group of family doctors working in partnership to provide high quality care for patients.

Clinicians

Dr Jo Parry-James Female *MRCGP, MBBS, BMed.Sci.*

Dr Parry-James first registered as a doctor in 2001.

Dr Ruth Pennington Female *BA,M Math,MA,MBBCh, MRCGP,DRCOG*

Dr Pennington first registered as a doctor in 2010.

Dr Rosaline Blundell Female *BSc., MBChB, MRCGP, DRCO*

Dr Blundell first registered as a doctor in 2008

Dr Dhivya Kartha Female *MBBS, MRCGP, DFSRH*

Dr Kartha first registered as a doctor in 2004

Dr Anant Mittal Male *MBBS, MRCGP, CCT, DFFP, DPD*

Dr Mittal first registered as a doctor in 2002

Dr Laura Mulcahy Female *MB ChB*

Dr Mulcahy first registered as a doctor in 2012.

Dr Fiona Green Female *MBChB, MRCGP*

Dr Green first registered as a doctor in 2011.

Nurse Practitioners: Carol Douglas-Jones, Bryony Evans

Paramedic Practitioner: Martin Brown

Practice Staff

Practice Manager Helen Jones MBA

Assistant Manager Shelley Price

Practice Nurses Martina Tham RGN, Melanie Arthur
RGN, Rebecca Burwood RGN

Health Care Assistants Elaine Tait, Shireen Hughes,
Naomi Jones

Administration Staff Karen Taylor, Carys-Wyn Jones, Pam
Smith-Ward, Trudy Owen, Emma Bell-
Vacher, Georgia Garrett

Dispensers Donna Clague, Kathryn Davies,

Dispensing assistant Donna Mayers

Medical Secretaries Paula Fortune, Mary Calby, Rachel
Harrison-Jones

Housekeepers Carla Pollard, Yvonne Roberts,
Semra Aygun

Maintenance Greg Ryan

Surgery Opening Hours - Mon to Fri 8.00am - 6.30pm
(For out of hours/emergency medical advice please see
reverse cover)

Dispensary Opening Hours - Mon to Fri 8.30am - 6.00pm
(closed for lunch 1.00pm – 1.30pm)
(For out of hours medication please see local press for
chemist details)

Doctors Availability

Dr Parry-James is available on a Monday and Friday

Dr Pennington is available on varying days

Dr Blundell is available on a Monday, Wednesday and
Thursday

Dr Kartha is available on a Wednesday and Friday

Dr Anant is available on a Monday, Tuesday and Thursday

Dr Mulcahy is available on a Monday, Tuesday and Thursday
morning.

Dr Green is available on a Monday, Tuesday and Wednesday

Each Doctor is required to take the role of On-Call GP on a rota basis and therefore it may not be possible to book an appointment to see them on one of their scheduled days if it is their On-Call GP day.

The On-Call GP has a range of duties including authorising prescriptions, operating the daily telephone clinic and dealing with emergencies.

**Betsi Cadwaladr University Health Board is responsible for commissioning North Wales GP Out of Hours Service.
Details are on the back of this leaflet**

Contact Details

You can contact the Practice in a variety of ways:

In person

The surgery is open from 8.00am - 6.30pm Monday to Friday.
We are not open on weekends or Bank Holidays

Via Klinik

Klinik is an online service through which Hope Family Medical Centre patients can contact the surgery to get help for medical problems. Requests are dealt with in order of clinical priority. To do this, go to the Hope Family Medical Centre website: www.wales.nhs.uk/hopefmc and click on the icon.

Via Telephone

You can call the Practice on **01978 760468**. You will be greeted by a message that gives you several options depending on what you may be contacting us about. Please try and select the most appropriate option to help us to try and deal with your enquiry as quickly as possible. Some options are only available at certain times i.e. the results line is only available from 2.00pm. The Telephone system offers a queueing system which ensures equity to patients contacting the Practice.

Via Email

You can contact the practice via email if you have a concern or query. **Please do not email prescription requests** as we cannot guarantee that they will be processed within the 48 hours. The email address is enquiries.w91013@wales.nhs.uk

Online

You can contact us through our website contact form by going to [Patient Feedback Form](#)

Via our online service

You can order repeat prescription, update your contact details and cancel appointments at: <https://www.myhealthonline-emisweb.wales.nhs.uk/>

Registration is required, please ask at reception for details.

PLEASE NOTE: Online services may be suspended at times when the surgery is under extreme pressure from increased demand and/or staff sickness.

Registering as a Patient

We accept patients to register on our list providing they live within a 3 mile radius of the surgery (as the crow flies). You will need to complete our registration forms and present to the surgery in person with a copy of your photo ID and address verification. If you have an urgent need for medication please advise the receptionist as a GP consultation may be necessary. We operate as a group practice and you may consult with any member of our team. However, should you have a preference for a particular doctor, please advise us and we will do our best to facilitate though, this may mean having to wait a little longer to see the doctor of your choice.

GP Appointments

Patients are encouraged to raise a request for an appointment via Klinik before 10am. This enables the patients to tell the clinician what their problem is without having to divulge it to a receptionist. All appointment requests whether Urgent, routine or advanced are requested in the same way. A clinician will then look through the request and take action appropriately, responding to patients via Klinik with either a solution to the problem or next steps (e.g. being contacted by reception offering an appointment). Children under the age of 16 presenting with an acute issue will be offered a same day consultation.

If you have been asked by the Dr to make a follow up appointment, this should also be done via Klinik. If you do not have access to the internet you can call reception and they can add it to the system for you.

Nurse Appointments

Appointments for routine Nursing procedures can be made by either raising a request via Klinik, by telephoning **01978 760468**, or by calling in to the surgery during normal opening hours, 8.30am-6.30pm.

Cancelling an Appointment

If, after making an appointment, you feel that it is no longer necessary, please cancel as soon as possible (preferably at least 24 hours in advance) so that we can offer this to another patient. Patients who do not attend a pre-booked appointment prevent others from being seen. Appointments can also be cancelled by responding to text reminders or by using Klinik.

Home Visits

Home visits are reserved for patients who are too ill to attend the Surgery, we generally follow the guidelines laid down by NHS Wales, which has approved the following: GP visit recommended to terminally ill, housebound and bed-bound patients.

Requests can be raised by calling the surgery. Please be prepared to give the receptionist some details of your illness so we can assess the relative urgency of calls for that day.

Whenever possible, try and come to the Surgery as facilities here are far better for examination and treatment. If you feel that a visit is necessary, please telephone the Surgery **before 10.00am if possible 01978 760468**.

Repeat Prescriptions

Patients requiring regular medication may, with a doctors approval, obtain repeat prescriptions by ordering them in person, online, by fax or by post (stamped, addressed envelope please). Please give us at least 48 hours (2 working days) notice.

Your prescription may be collected in person, posted to you (if you include a SAE with your request), or sent direct to a local chemist.

Please note if you request a neighbour or friend to pick up your prescription it will be assumed that you are happy with them being aware of the information on the prescription or medication label.

Please note that we cannot accept telephone requests for prescriptions (except registered blind patients).

Obtaining Your Medicines

If you live more than a mile (as the crow flies) from a chemist, you may obtain your medicines from our dispensary between the hours of 8.30am and 6.00pm. (Monday-Friday).

Please note that if you are collecting items that are classed as a controlled drug from the dispensary you may be subject to a delay due to the legal requirement that controlled medication must be signed out by a clinician before release. We will do our very best to keep this delay to a minimum.

The nearest chemist to the surgery is Castle Pharmacy, High Street, Caergwrle, Tel: 01978 760565 Monday-Friday 9.00am-1.00pm and 2.00pm-6.15pm and Saturday 9.00am-1.00pm.

If closed, Boots the Chemist, 7 Broughton Shopping Park, Chester Road, Broughton, Chester. Tel: 01244 538520 is open Monday-Saturday 9.00am-12 midnight and Sunday 11.00am-5.00pm.

**For details of other duty chemists, please see local press.
Services Available at the Practice**

Asthma/COPD

Asthma/COPD patients should have a regular review with a member of the practice nursing team, clinics are available at various times throughout the week. The aim of these clinics is to provide continued monitoring and care of patients with asthma/COPD and help them improve self-management.

Diabetic

Diabetic patients should have a regular review with a member of the practice nursing team, clinics are available at various times throughout the week. The aim of the clinic is to achieve good control of diabetes and prevent complications by providing regular check-ups and education.

CHD (Coronary Heart Disease)

An annual review with a practice nurse will be offered to all patients who have ever had angina, heart attack or heart surgery. The aim is to review the condition, optimize the treatment and lower risk factors in order to prevent further illness.

Minor Ailments Clinic

A minor ailments clinic is run by our nursing team every day and you will be able to get advice on and treatment for throat infections, ear infections, vaginal discharge, urinary tract infections, emergency contraception, insect bites and stings, hay fever, conjunctivitis and other minor illnesses.

Childhood Immunisations

Immunisation is the safest and most effective way of protecting your child against serious disease. By having your child immunised at the recommended times, you are protecting them through childhood against various diseases. If you feel you need any further information or to discuss any concerns you may have, please speak with the Health Visitor Team on 0300 085 9695.

Influenza

Clinics for Influenza vaccinations are usually available from September until December. Influenza immunisation is offered to patients aged 65 and over (as at the 31st March of the following year) together with other at-risk groups.

Additionally, it is recommended that all patients who fall into any of the above categories also have a Pneumococcal vaccination. This is a once in a lifetime vaccination and helps protect from pneumonia. Further details are available from a Doctor, Nurse or Receptionist.

Blood Testing

If you are advised to have a blood test this can be arranged at the practice with our phlebotomist. Please visit:

<https://bcuhb.nhs.wales/services/bloodtest> or call **03000 850047**

Holiday Vaccinations

People travelling abroad need to protect themselves against various diseases prevailing in a particular country. Information on vaccinations required can be obtained from the surgery by booking an appointment eight to twelve weeks before the date of travel.

Cervical Smears

Women from the age of 25 are invited for screening every three years. Women aged 50 to 64 are invited every five years. Upon receipt of the letter from Cytology Screening Wales, please telephone for an appointment. If you feel that your smear is overdue, please contact the surgery and we shall be happy to check this for you.

Family Planning

Family Planning advice is provided by nurses within the practice. Details of alternative locations are available on request.

Maternity Care

Community Midwives provide comprehensive care for expectant mothers and their new babies. For an antenatal appointment please telephone 01978 318327.

Self-treatment of Common Illnesses and Accidents

These notes are for guidance only; should patients or their relatives be sufficiently anxious about a complaint because of its severity, persistence or failure to respond to appropriate measures, they should of course, contact the surgery for further advice.

Diarrhoea/Sickness

This is usually due to a virus, and often settles in 1-2 days without any treatment. You can help by avoiding food and milk and by drinking clear fluids - water, squash or cola drinks - little and often. The diarrhoea can drag on afterwards and then a drug like "Imodium" from the chemist can help. Sickness and diarrhoea in babies and very young children can lead to dehydration - this can normally be avoided by following the same advice, i.e. stop milk (except breast milk) and give small frequent drinks of boiled water or an electrolyte solution such as Dioralyte from the chemist.

As the child improves, milk and solids can gradually be started over the next 1-2 days. If a child is still passing urine regularly, this is a good sign that he is not dehydrated. If in any doubt about the severity or length of a child's illness, do not hesitate to contact the surgery.

Back Pain

Most people occasionally suffer back pain and some are more prone than others. Considering the complexity of bones, joints, muscles and ligaments it is no surprise that this is a common cause of disability and work absence.

Sudden severe back pain is helped by pain relievers such as combinations of Aspirin, Paracetamol and Codeine from the chemist. Ibuprofen (Nurofen) may also help. A heat pad or safe hot water bottle in the small of the back relaxes painful muscles.

At first you might need to lie on the floor (or a hard bed) flat on your back. Try placing a small cushion or support under the small of the back to keep the natural curve of the spine. As soon as possible try to roll to your front. Then use your arms to gently raise the shoulders arching the back slightly.

Repeat this simple extension exercise hourly, and as soon as possible progress to sitting and walking.

Whether lying or sitting always try to keep the arch in the small of the back by placing a 6" soft foam roll or small cushion there. To prevent chronic back pain try regular walking, cycling or swimming.

Always lift with the back straight or gently arched and use the power of the leg muscles. Avoid prolonged sitting and soft lounge chairs. Use an upright kitchen type chair and a small cushion as described above. Use a support in the car seat. If pain does not respond to these measures or is getting worse arrange to see the doctor.

Thrush

Many women have experienced this irritating complaint which is characterised by a white, itchy discharge. It can be treated with antifungal treatment (available from the chemist without prescription). Avoidance of nylon underwear, bubble bath and soap can reduce the chance of recurrence. If symptoms persist see the nurse.

Cystitis

Frequently passing urine which stings or burns suggests cystitis, which is sometimes caused by infection. If drinking plenty of fluids including bicarbonate of soda (1 teaspoonful per glass of water 4 times daily) does not relieve the symptoms, see the nurse. Remember to bring a fresh (not necessarily the first of the day) sample of urine in a clean container to be tested.

Burns

Apply large quantities of cold water to the affected area as soon as possible and maintain this until the pain subsides. This may take as long as 15 minutes! If the skin is unbroken but blistered, apply a loose, dry dressing. If the burn is larger than 4 or 5 inches in diameter or if the skin is broken, consult the doctor.

Colds

Even in this day and age there is still no magic cure for the common cold. Go to bed, take plenty of drinks. If you have a headache or are feverish, take Ibuprofen or Paracetamol. Do not bother to take any antibiotics you may have in the house – these will have no effect!

Sprains

Firstly, apply a cold compress, containing ice if possible, for 15 to 30 minutes to reduce the swelling. Apply, firmly, a crepe bandage, elevate the affected limb and give the sprain plenty of rest until all discomfort has subsided. Further strain will inevitably lead to further swelling and a longer recovery period. Ibuprofen (e.g. Nurofen) will help.

Nose Bleeds

Sit in a chair (leaning forward with your mouth open) and pinch your nose just below the bone for approximately 10 minutes, by which time the bleeding should have stopped. If symptoms persist, consult your doctor.

Minor Cuts & Grazes

Wash the wound thoroughly with water and a little soap. To stop bleeding apply a clean handkerchief or dressing firmly to the wound for about 5 minutes. Cover with a clean dry dressing.

Insect Bites & Stings

Antihistamine tablets can be obtained from the chemist without prescription and will usually relieve most symptoms. An ice cube placed over the sting will help.

Note: Bee stings should be scraped away rather than 'plucked' in order to avoid squeezing the contents of the venom sac into the wound.

Head lice

These creatures, contrary to popular belief, prefer clean hair and are, therefore, not a sign of poor personal hygiene. Treatment can be obtained from the chemist without prescription.

Chickenpox

On the first day a rash appears as small red patches about 3-4 mm across. Within a few hours of these developing, small blisters appear in the centre of these patches. During the next 3 or 4 days further patches will appear and the earlier ones will turn 'crusty' and fall off.

Oily Calamine Lotion may be applied to soothe the often severe itching. Cool baths may also help. The most infectious period is from 2 or 3 days before the rash appears and up to 5 days after this date. Children may return to school 7 days after the last crop of spots develop.

**Alternatively for advice you can contact NHS Direct on
0845 4647(www.nhsdirect.nhs.uk)**

When Your Child Has a Temperature

A child will develop a temperature because of an infection; usually the child will get over such an infection without the use of antibiotics. Most childhood infections are caused by viruses and these DO NOT respond to antibiotics.

The following advice is to help you bring your child's temperature down and make them feel better.

1. If your child feels hot and appears unwell take his or her temperature, if you have a thermometer. The normal temperature is 37.0 °C. If either the temperature is raised or you don't have a thermometer, but you think your child has a temperature, try to lower it as follows:-

- i) Give your child Paracetamol syrup (Calpol, Disprol). We suggest you always keep a supply at home. Give the dosage stated for a child of that age. Repeat the dose of Paracetamol every 4 hours if necessary.
- ii) Dress your child in cool clothes; T-shirt and shorts etc. Much heat is lost through a child's head so leave it uncovered. Cool down the room by opening doors and windows.
- iii) Give your child plenty of cool drinks as fluid is lost with a fever. If he or she is reluctant to drink, encourage small amounts from a favourite cup.
- iv) Sponging your child down, particularly the head, with a tepid flannel, will make him or her feel better as well as bringing their temperature down. Using tepid water is more effective than using cold water.

If your child does not improve after giving Paracetamol and sponging, or appears particularly ill, contact the doctor.

7. Ill children will always be seen as soon as possible if brought down to the surgery. You will not make your child worse by taking them in a pram or car to see the doctor. Sometimes the fresh air makes children feel better.

8. A child with a fever is likely to be restless at night. Offer cool drinks and sponge them down if they wake.

9. Very rarely a child under 5 years will have a convulsion with a high temperature. The child suddenly shakes all over and then becomes very still. If your child does have a convulsion it should subside in less than 5 minutes. Lie the child on his or her side and stay with him or her while it lasts. If there is another adult in the house ask them to call the doctor. If not, call the doctor when the convulsion has passed.

Putting Things Right - Dealing with “Concerns”

As a “responsible body” under the terms of the 2011 Regulations, Hope FMC adopts the NHS Wales principles of dealing with complaints, claims and incidents. These arrangements became applicable from 1st April 2011, transitional procedures are available on request. Hope FMC concurs with the NHS in Wales and aims to provide the very best care and treatment and it is important we welcome comments and learn from people’s experiences, good or bad. The vast majority of our patients are happy with the service they receive however there will be occasions when things might not go as well as expected. When this happens, we need to look at what went wrong so we can try to make it better.

What is a Concern?

A concern is when a patient or member of staff feels unhappy about any service provided by the Practice in representing the NHS. By telling us about the concern, we can apologise, investigate and try and put things right. We will also learn lessons and improve services where they need to be better.

How is a Concern actioned?

A concern is normally recorded and investigated by the Practice Manager who has the role of Responsible Officer/Senior Investigations Manager, in her/his absence this will be delegated to a nominated member of staff who has received appropriate training in handling concerns.

What happens to a Concern?

A concern is acknowledged (usually in writing) within 2 working days, excludes weekends and bank holidays. An investigation then takes place and further information or specialist advice may be sought. In most cases a final response is made within 30 days of the date when the concern was received, excludes weekends and bank holidays. If this is not possible we will provide reasons why and confirm when a reply can be expected.

Do you need help raising your concern?

Help or support is available via your local Community Health Council (CHC)

Cartrefle, Cefn Road, Wrexham, LL13 9NH Tel: 01978 365178
or via the Health Board Concerns Team, Ysbyty Gwynedd,
Bangor, Gwynedd, LL57 2PW Tel: 01248 384194

What happens if the person is still unhappy?

The person raising the complaint can contact the Public Services Ombudsman for Wales. (Tel: 0845 601 0987)
www.ombudsman-wales.org.uk

A leaflet entitled "Putting Things Right" is available on request.

Practice Charter

Hope Family Medical Centre is committed to providing a high quality primary health service to meet the needs of all our patients. We regard the care of your health as a partnership between yourself and the Practice. The success of this partnership depends on co-operation and shared responsibility. In the Charter we set out what our mutual responsibilities are to achieve a high standard of care.

Our Responsibilities to You:

- You will be treated as a partner in the care you receive.
- You will be treated as an individual and will be given courtesy and respect at all times.
- You will be able to speak to a Doctor of your choice, where possible and subject to availability.
- We aim to have the majority of your repeat prescription requests ready within 2 working days.
- You will be able to access urgent medical advice on the same day as your request. We will ensure that you are given instructions on how to obtain emergency care when we are closed.

- You have the right to be treated with confidentiality, and the contents of your medical records will be kept confidential.
- You have the right to see your health records subject to any limitations in the law and the Doctors approval.
- We will inform you about how you can make suggestions or complaints about the services we offer. Any complaints will be dealt with as swiftly as possible.
- We have the right to remove patients from our list if they repeatedly and persistently ignore their responsibilities to us and other patients. An explanation will be given should we arrange for you to be removed from our list.
- We will visit you at home if you are too ill or infirm to be brought to the Surgery.
- We may sometimes have medical students, you will have the choice of whether or not to participate.

Your Responsibilities to Us:

- We ask you to treat all members of the Practice Team with courtesy and respect. Please do not shout at us or use foul language or swear words while on our premises.
- We operate a Zero Tolerance Policy and will not tolerate any unacceptable behaviour on the premises or towards our team.
- You are responsible for your own health. Please act on our advice and take medication as prescribed.
- Please inform us of any change in name, address or telephone number.
- If you do not understand what we tell you, please ask us to explain again.
- If you do not speak or understand English well, please bring an interpreter along with you when you come to the Surgery.
- Be punctual for appointments and let us know in good time if you are unable to attend.

- Wherever possible please use the automated check in or ask the receptionist to check you in on arrival.
- Only request a home visit if it is impossible to come to the Surgery.
- Please remember that the Doctor or Nurse of your choice may not always be available due to other commitments but you will always be offered an alternative.
- Always order your repeat prescription in plenty of time, don't wait until your medication has run out.

Data Protection / Confidentiality

Hope Family Medical Centre collects personal confidential information about you. This information may include (but is not limited to):

- Your name, address telephone number, date of birth and next of kin
- Appointment details, associated admissions
- Correspondence, notes and reports
- Investigations and test results

The practice uses this information for the following reasons:

- to help inform the decisions that we make about your care
- to ensure that your treatment is safe and effective, including any advice that may be provided as part of your care
- to help us work effectively with other organisations who may also be involved in your care.

INFORMATION SHARING

Hope Family Medical Centre may share information held about you with other organisations to support:

patient care (identifiable information):

- to promote continuity of care by sharing your information with other professionals involved in your care
- to promote safe care by sharing your information with other health care professionals who might be involved in your care such as emergency departments and out of hours doctor services

planning and assurance (information in anonymised format which does not include information from the patient written notes):

- to help protect the general health of the public
- to manage and plan services for the future
- to review the quality of care provided by the practice to ensure it remains effective
- to help our staff review the care that is provided to ensure it is of the highest standard and to enable the continual improvement of care
- to comply with a legal obligation

Organisations with which information is routinely shared with for the reasons set out above include but are not limited to:

For patient care:

- Local hospitals
- Emergency and out of hours services
- GP clusters

For planning and assurance:

- NHS Wales
- Betsi Cadwaladr University Health Board

OPTING OUT

All patients have the right to opt out of allowing their personal information to be shared with other healthcare organisations. If you wish to do this, please speak to a member of the practice staff.

For more detailed information about your rights and our responsibilities in respect of data protection, we have a number of information leaflets that are available in our waiting areas and reception. Easy read format, as well as information in other languages, is available upon request.

Hope Family Medical Centre regularly use text and email as efficient ways to communicate with patients. Please ensure we have your most up to date information. Please be assured that this information will not be passed to any third party and we will only use these methods of communication to provide you with information relating to your health. If you would prefer not to receive emails and texts from us please let us know and we can update your preference.

SECURITY OF YOUR INFORMATION

Hope Family Medical Centre have a range of security measures in place to ensure that your information is held, and where appropriate, shared in a secure way. Your patient record will only be accessed by those members of practice staff who are authorised to do so.

If you have any concerns about the way we handle your information, please speak to a member of the practice staff.

We respect your right to privacy; your medical records are held in the strictest confidence. Information is not passed on without your consent unless it is within the confines of the NHS, by legal framework, or is in the public interest. Certain anonymised patient data may be shared for the purposes of public health and audit, research, teaching and training. This practice is registered under the Data Protection Act. It is a practice and a legal requirement that all staff maintain confidentiality of patients' records.

Written consent for the disclosure of notes for solicitors or insurance firms is required from the patient before any information is released.

Accessing your own Medical Records

If you wish to access your medical records held at the Surgery then we suggest, in the first instance, that you discuss your wish with your usual doctor - they may be able to tell you the information you wish to know without you having to request a copy of your notes.

If you do not wish to discuss your request with your doctors then you can make a request to a member of the Practice Team. Requests to access your health record should provide enough information to identify yourself and the period of time or specific treatment you want records for. We comply fully with the Access to Medical Records legislation.

Your information will be provided to you within 1 calendar month, after your request has been received.

Under the law there may be some rare circumstances when the information you have requested cannot be provided to you.

If your enquiry is with regard to your hospital records you will need to discuss this further with the Access to Medical Records officer at the hospital who will help you further.

Access for patients with special needs

The surgery has full wheelchair access and a disabled toilet on the ground floor. Disabled parking is available in the surgery car park although patients park at their own risk. Portable Induction Loops are available on Reception and in the Consulting Rooms - please ask at Reception should you require this facility. It is Practice Policy for all letters and documents to be produced in Arial, font size 12 wherever possible. All letters are produced in black ink on white paper. If you have a disability and have any suggestions in which we could improve our current access, please let us know by either speaking to a member of staff or by putting your suggestion in writing.

Medical Students

We train final year medical students from Cardiff University Medical School. At certain times medical students will be accompanying doctors or nurses during consultations. We will inform you and ask your permission if a student is involved in a surgery you are attending. You may decline any student consultations.

Patient Participation Group

The Practice has an active Patient Group who meet bi-monthly. New members are always welcome, for further information please contact the surgery.

Hope Surgery Equipment Fund

Donations received are used to purchase special medical equipment to enable us to improve our service. Details of recent purchases are available on request.

Violence & Aggression

We operate a zero-tolerance policy towards any form of aggression or violence against any member of staff, patient or visitor on our premises.

This includes all forms of physical, verbal or threatening behaviour.

Any such action may result in a patient being removed from the practice list, alternatively restrictions may be placed on the services we provide to him/her.

**You will be notified of any changes in our Practice Policy
by an
appropriate notice within the surgery reception area**

Protected Education Time

One afternoon each month, the surgery will operate an emergency only service so enable the staff to carry out important update training. On these afternoons, during the hours of 1pm and 5pm the telephone lines will be closed and a message providing an emergency number will be heard. A

receptionist will answer the emergency line and a GP will determine if the call is an emergency or whether it can be dealt with when the surgery re-opens at 5pm. During this time the dispensary will also be closed.

Details of Primary Care Medical Services in the Area can be obtained from the Local health Board
